

FOR IMMEDIATE RELEASE

Bee Vectoring Technologies Welcomes Gustavo C. Gonzalez to its Board of Directors

Mississauga, ON Canada and Sacramento, CA USA (May 2, 2024) – Bee Vectoring Technologies International Inc. (the “Company” or “BVT”) (CSE: BEE) (OTCQB: BEVVF) (CVE:BEE), a pioneer in natural precision agriculture, is delighted to announce the addition of Gustavo C. Gonzalez to the Company’s Board of Directors, effective May 1st, 2024.

With a robust background rooted in international agribusiness, Mr. Gonzalez brings to BVT an extensive network of industry connections cultivated over years of service in notable global regions, including Argentina, Brazil, the USA, and Switzerland. He holds a Bachelor of International Business Administration from Boise State University, along with executive program credentials from globally recognized institutions such as INSEAD, Northwestern, Purdue and ESADE universities.

Mr. Gonzalez’s professional journey is marked by his tenure in critical roles within the seed and crop protection sectors, most recently serving as Vice President of Commercial Business Development at AgBiome. His prior experiences at BASF, Bayer Crop Science, and Syngenta have endowed him with valuable insights and a proven track record in new business development, commercial strategy, and market expansion for the agricultural supply chain.

"Gustavo’s appointment is a reflection of our commitment to lead the industry into a future where innovation and sustainability are at the core of growth," said Ashish Malik, CEO of Bee Vectoring Technologies. "Having Gustavo in our team aligns with our strategic initiatives to expand our global reach. His extensive experience in agribusiness and profound understanding of the international market dynamics will be pivotal as we scale our unique technology. We are thrilled to harness his expertise as we continue to revolutionize the way crops are cultivated and protected."

About [Bee Vectoring Technologies International Inc.](#)

BVT, an agriculture technology company, is a market disruptor with a significant global market opportunity in the \$240 billion crop protection and fertilizer market. BVT has pioneered a natural precision agriculture system that replaces chemical pesticides and wasteful plant protection product spray applications by delivering biological pesticide alternatives to crops using commercially grown bees. BVT’s award-winning technology, precision vectoring, is completely harmless to bees and allows minute amounts of naturally-derived pesticides (called biologicals) to be delivered directly to blooms, providing improved crop protection and yield results than traditional chemical pesticides - and improving the health of the soil, the microbiome and the environment. Currently, BVT has over 55 granted patents, many more patents pending in all major agricultural countries worldwide and has US EPA registration of its Vectorite™ with CR-7 (EPA Registration No. 90641-2) for sale as a registered biological fungicide for use on the labeled crops.
